

# sustainable sanitation alliance

Humanitarian WASH @ Stockholm

Organised by: SuSanA, BORDA and the German Toilet Organisation and Solidarities International

## Showcase: “Improving Emergency Wastewater Management: The Compendium of Sanitation Technologies in Emergencies”

Time: 9:00 – 10:30

Venue: Room NL 253

Aims of the meeting:

1. Presentation of the draft Compendium as a key and globally applicable resource when planning and implementing sanitation hardware solutions in emergencies
2. Overview of the Compendium development process highlighting possibilities for organisations, agencies and individuals present in Stockholm to become actively involved in the further development and reviewing process.
3. Get in-depth feedback on the envisioned structure, dissemination and possible synergies,
4. Raising awareness for the importance to introduce a system perspective and include a longer-term sustainability dimension when implementing sanitation, wastewater and faecal sludge management infrastructure in emergencies

Time (minutes)	Content	Presenter
09:00-09:10	Existing Sanitation Challenges: Reflections from Recent Emergencies	Franck Bouvet, Global WASH Cluster
09:10-09:30	The Compendium of Sanitation Technologies in Emergencies – overview	Robert Gensch, German WASH Network
09:30-10:15	Round Table Discussion	Philippe Reymond, Samuel Renggli, EAWAG
10:15-10:30	Summary from the Tables	All

### Background

The “Compendium of Sanitation Technologies in Emergencies” currently being developed by German WASH Network, Eawag, Global WASH Cluster, SuSanA and key humanitarian WASH organisations is trying to fill this gap with a user-friendly, state-of-the-art capacity development and decision support tool based on the experience and expertise of a wide range of humanitarian and development WASH professionals. The publication is intended to be launched by March 2018 as part of the Global WASH Cluster Annual Meeting. Stockholm World Water Week provides an exceptional and timely platform to present a first draft of this multi-agency publication as it allows bringing together humanitarian and development actors from policy to practise to get in-depth feedback and discuss policy implications and dissemination strategies.

**SuSanA Working Group 8 –  
Sanitation in Emergencies: Faecal Sludge Management in Emergencies**  
**Venue:** Hotel Scandic Klara, Slöjdgatan 7, 111 57 Stockholm  
**Time:**11:00 – 12:30

Aims of the meeting:

1. Overview of WG activities
2. Share an update on the HIF emergency FSM project
3. Explore the technical options for faecal sludge management

Time (minutes)	Content	Presenter
1100-1115	Welcome and overview of current WG 8 activities	TBC
11:15-11:30	Further discussions on the 'The Compendium of Sanitation Technologies in Emergencies'	Robert Gensch, German WASH Network
11:30- 11:45	Overview of the HIF emergency FSM project	Amy Jennings, BORDA Alberto Acquistapace, Solidarities International
11:45-12:55	Faecal sludge management in rapid onset emergencies – your technical review!	Amy Jennings, BORDA Alberto Acquistapace, Solidarities International
1255-1300	Thanks and close	TBC

**Background to the HIF project**

Appropriate faecal sludge management is one of the predominant gaps in emergency WASH. The aim of this project is to develop and effectively disseminate guidance on methods of faecal sludge disposal in rapid-onset emergencies. This guidance will support humanitarian practitioners in site selection and establishment, as well as associated risk mitigation.

This meeting provides an opportunity for SuSanA WG 8 members to meet in one place at World Water Week will allow space for discussion and feedback on the project.

The SuSanA meeting will be held at the Scandic Klara: Hotel Scandic Klara, Slöjdgatan 7, 111 57 Stockholm,
