Dear Reader

The WASH in Schools Network (UNICEF, GIZ, Save the Children, WaterAid; Emory, LSHTM, among others) has compiled this knowledge map with links to relevant materials about COVID-19. The map addresses information needs for learners, their families and the education system as a whole. This includes the school level, the sub-national level as well as the national level. The map is intended for the time when schools are closed and in preparation for re-opening of schools.

We want to help you navigate through the vast amount of information about COVID-19, specifically its relevance for the school community. Therefore, we selected relevant information from high-quality, reliable sources for the education system, families and for pre-primary, primary and secondary school children.

Handwashing with soap is the first line of defense against COVID-19. Water, sanitation and hygiene are essential services to tackle coronavirus and need to reach everyone including children. Those providing WASH services during the pandemic need to ensure they ‘do no harm’ through their response. This means no direct people-to-people / community gatherings for hygiene promotion whilst social distancing guidance is in place and ensuring any messaging avoids stigmatising or increasing the risk of violence or backlash to any group.

We will update the material regularly and include new material. Please write to Wins-COVID-19@susana.org, if you come across helpful websites, links or videos. Following a careful quality control it may be included in our knowledge map.
CORE MESSAGES FOR CHILDREN DURING COVID-19 RESPONSE

- Wash your hands with soap and water for at least 20 seconds, especially
  - after going to the toilet
  - before touching food, eating or feeding a child
  - after coughing and sneezing
  - after playing or doing things outside

- When you sneeze or cough, cover your face with your bent elbow or
  cover your nose and mouth with a tissue and throw it away in a closed bin.

- Tell your family or someone who looks after you if you feel unwell,
  have a fever, cough or find it difficult to breathe.

- Don’t touch others when greeting. You can use gestures like waving, bowing,
  a namaste or hand on your heart. Keep apart from people outside your family
  (at least 1 meter) if you can.

- Try not to touch your face, nose, mouth.
SUPPORT DURING SCHOOL CLOSURE

MATERIALS FOR THE EDUCATION SYSTEM

MATERIALS FOR LEARNERS

MATERIALS FOR FAMILIES
FOLLOW THE STEPS BELOW:

Steps to help prevent the spread of COVID-19 if you are sick

Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.

• Cover your coughs and sneezes with a tissue, then throw the tissue in the trash. Use a paper or cloth handkerchief if available. If you don’t have a tissue, cough or sneeze into your elbow.

• Cover your mouth and nose with a facemask (for example, because it causes trouble breathing), then people who live in the home should stay in a specific “sick room” together until they feel dry.

• Wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.

• Avoid close contact with people who are sick. If the person who is sick is not able to wear a facemask, then people who live in the home should stay in a specific “sick room” together until they feel dry.

• Avoid sharing personal household items. Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people in your home.

• If you are caring for others: You should wear a facemask while caring for them, and after you interact with them. See COVID-19 and animals for more information.

• If you are sick: You should wear a facemask while caring for them, and after you interact with them. See COVID-19 and animals for more information.

• Avoid touching your eyes, nose, and mouth.

• Keep your pet with you. If you must care for your pet or be around pets at home, wash your hands with soap and water for at least 20 seconds.

• Avoid sharing personal household items. Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people in your home.

• Do not share personal household items with unwashed hands.

• Cover your coughs and sneezes with a tissue, then throw the tissue in the trash. Use a paper or cloth handkerchief if available. If you don’t have a tissue, cough or sneeze into your elbow.

• Cover: Hands!

• Washing Your Hands: Your hands can still have icky germs!

• Stop the spread of germs
