A Platform for Integrated Sanitation Investment Planning
Proof of Concept (PoC)

Sujaya Rathi

Center for Study of Science, Technology and Policy (CSTEP), India

Advocates

1. **Think Systems (beyond toilets)**

2. **Think Options (relevance, not only high cost but also underground sewerage option)**

# Tool provides and allows for...

A GIS enabled user interactive interface

Assessment of the impact of various alternative systems
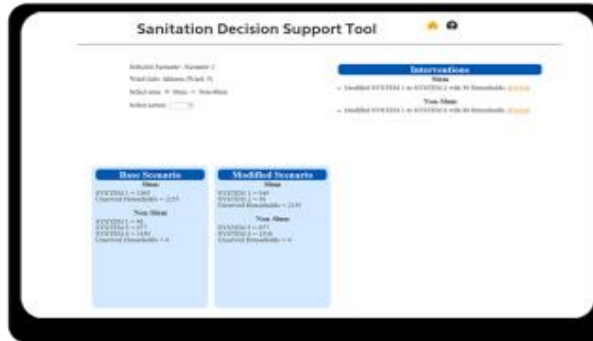

Collaboration and consultation

Comparison of various sanitation system options and assessment of trade-offs.

The Tool

Screen 1- Zone Information

Screen 2 – Zone Level Interventions

Screen 3 – Indicators-Zone level

Screen 4 – Indicators-City level

Screen 5- Scenario Comparison

Beneficiaries

- **Urban Local bodies**

- **Consultants – complements City Sanitation Plan development, Feasibility study)**

- **Funders (ADB, World Bank, JICA, etc)**

- **Policy Makers**

- **Technology Developers (** to add their systems into this tool, also understand the performance of its own system vis-à-vis other systems**)**

The Tool

Knowledge Bank

Repository of different systems

- Continued up-dation wrt. system information
- Up-dation from field data
- Vendor information for pilot initiation

Replicability

City Databank
Repository of city data

- Survey data – updation/compilation from various surveys conducted in the different cities
- Systematic collection of sanitation data
- Update the performance of new systems for feedback in the system parameters

Scalability

FSM3
