Sustainable Sanitation Alliance (SuSanA) at World Water Week Stockholm (Booth No. D:22) August 2019
The SuSanA Forum

The Sustainable Sanitation Alliance (SuSanA) is an open global network whose members and partners are dedicated to advancing sustainable sanitation systems. The overall goal of the SuSanA is to contribute to the achievement of the Sustainable Development Goals (SDGs) by promoting a systems approach to sanitation provision taking into consideration all aspects of sustainability.

SuSanA has over 11,000 individual members and 350 partner organizations (August 2019) – NGOs, private companies, multilateral organizations, government agencies and research institutions. SuSanA members develop, accelerate and exchange innovations and act as a sounding board to innovative quality publications and products such as the SFDs (Excreta Flow Diagrams).

SuSanA's regional chapters connect SuSanA to the regions with their local needs and make SuSanA's knowledge products and services more accessible “on the ground.”

Membership (for individuals) as well as partnership (for organizations) with SuSanA is free and open to all who are interested in sustainable sanitation.
