</table>

## Inputs from the Plenum
- Zambia Inputs
- Jordanien Input?
- Open Stage

## World Café- Discussion of an ideal concept for WASH in schools with key questions

1. **Key actors**
   - Which actors do you need to bring together for a holistic approach?
   - How do you integrate them within your project?
   - Where do you look for synergies in the local context?

2. **Software aspects**
   - How important is campaigning and media attention for a successful approach?
   - What are potential benefits and risks?
   - How do you create demand for your concept?
   - What are potentially good incentives?
   - How do you engage the different actors?

3. **Hardware aspects**
   - What do you need for sustainable, successful implementation?
   - How do you balance software and hardware?
   - How do you integrate existing structures and the local context?

4. **Quality assurance and Monitoring**
   - How do you endure longterm quality of the implemented structures (hardware and software)?
   - How do you monitor the results effectively and resource-efficiently?

## Wrap-up and strategic outlook

Key messages of the working groups

Discussion: Role of WG 7:
- Case Stories
- Wiki
- Concept collection? Best and worst practices
