WASH e-Library

Automate the collection of WASH related content from known libraries and sources on the web.

Increase efficiency for people to:

1. Find resources

   - Get “top" references on a particular sub topic, while still making other resources available.
   - Identify the mix of pure research, project reports, grey literature
   - Group items in particular sub-libraries.
WASH e-Library: Our plan
Roadmap of feature development

Indexed content

• Phase 1: **documents**: research and publications (e.g. reports)

• Phase 2: ...plus **news** (media and self-published news e.g. blogs), **images/diagrams** (extraction), **videos** and **people** (expert lists)

• Phase 3: ...plus **social media** (social media aggregation)

Search capability

• Phase 4: Smarter search based on user purpose/intentions/relevance
SuSanA Working Group 1: Capacity Development

Thursday, Aug 27
13:30-15:30
Room 351, Nora Latin Building
